SUMMARY

Computer Science Engineering student skilled in MERN Stack, Python, AI/ML, and full-stack web development. Experienced in building AI-based and web applications including coding platforms, cybersecurity tools, and machine learning projects. Strong problem-solving skills with hands-on experience in React.js, Node.js, MySQL, and Python.

TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript
- **Frontend:** HTML, CSS, React.js
- **Backend:** Node.js, Express.js
- **Database:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Tableau
- **Concepts:** Data Structures & Algorithms, OOP, DBMS, Machine Learning

SOFT SKILLS

Quick Learner
Problem Solver
Team Collaboration

WORK/PROJECT EXPERIENCE

AI & Data Science Intern — 1 Million 1 Billion(Sep 2025 – Oct 2025)

- Designed and implemented an AI-based leak detection system for pipeline monitoring using Python, IoT sensor data, and machine learning algorithms.
- Built predictive models using Python and scikit-learn to identify abnormal flow patterns and detect potential leaks in real time.
- Automated data collection, preprocessing, and visualization workflows to improve monitoring efficiency and reporting accuracy.
- Developed interactive Tableau dashboards for real-time analytics, system monitoring, and decision support.
- Contributed to a projected 25% reduction in water wastage through early leak prediction and automated alert mechanisms.

AI Coding Game Platform (In Progress) | MERN Stack - Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript

- Developing a full-stack coding practice platform inspired by competitive coding websites like LeetCode.
- Implementing interactive coding challenges with real-time code submission and automated evaluation features.
- Building leaderboard, progress tracking, daily coding challenges, and gamified learning modules to enhance user engagement.
- Designing a responsive and user-friendly interface for seamless coding practice across devices.
- Integrating problem categories, difficulty levels, and performance analytics to improve learning experience.

AI Crop Disease Detection System (Machine Learning Project) - Tech Stack: Python, TensorFlow, OpenCV, Flask, CNN

- Developed an AI-powered crop disease detection system using Convolutional Neural Networks (CNN) for agricultural assistance.
- Trained image classification models on plant leaf datasets to identify diseases and provide early diagnosis.
- Built a web-based interface allowing users to upload crop images and receive instant disease predictions.
- Focused on improving farming productivity and reducing crop loss through AI-based monitoring solutions.

Cybersecurity Port Scanner (Python Project) - Tech Stack: Python, Socket Programming, Multithreading

- Designed and implemented a network port scanner for identifying open ports and analyzing active services on target systems.
- Integrated multithreading to improve scanning speed and optimize network security assessment processes.
- Strengthened understanding of networking concepts, cybersecurity principles, and penetration testing methodologies.

Portfolio (Currently Developing)

- Building a personal developer portfolio website to showcase projects, technical skills, certifications, and achievements.
- Creating responsive UI sections for projects, resume, contact information, coding profiles, and technical blogs.
- Focusing on clean design, modern animations, and recruiter-friendly presentation to improve professional visibility.

EDUCATION

MCKV INSTITUTE OF ENGINEERING

2022 - Present

- Major in Computer Science and Engineering.

CBSE (XII)

2021 - 2022

- Secured 85.8% and 3rd position in School.

CBSE (X)

2019 - 2020

- Secured 86% in class 10th.

ADDITIONAL INFORMATION

Languages: English, Hindi, Bengali.

Certifications:

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Python Basic – HackerRank – May 2024
- Problem Solving (Basic) – HackerRank – Sep 2024
- Getting Started with AI – IBM – Mar 2025
